

World Economic Indicators Data Analysis Storytelling

How a country can attain sustainable growth?

Anees Kr. Ghosh

Improvement of SDG needed through better healthcare that will result in improving the quality of life and birth rate. As we see Europe has the highest health exp/capita.

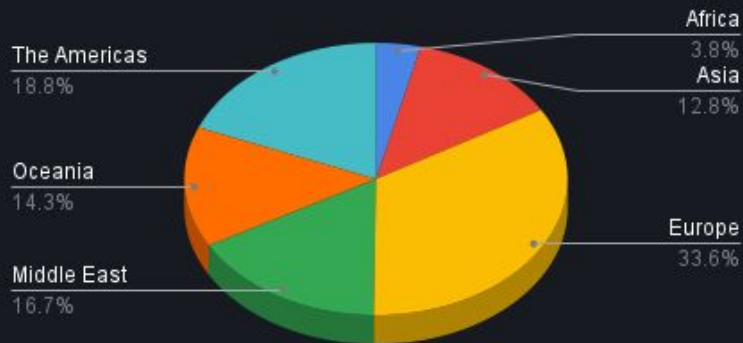

Internet Usage, Mobile Phone Usage, Energy Usage,
CO2 Emissions are directly connected to environment. In this field Europe is followed by other regions. So for better sustainable development Europe should reduce CO2 emission and focus on renewable energy.

Tourism, Business Tax Rate has directly impact on GDP. Here also Europe has less business tax and highest tourism.
Also Africa and America region country should reduce business tax rate.

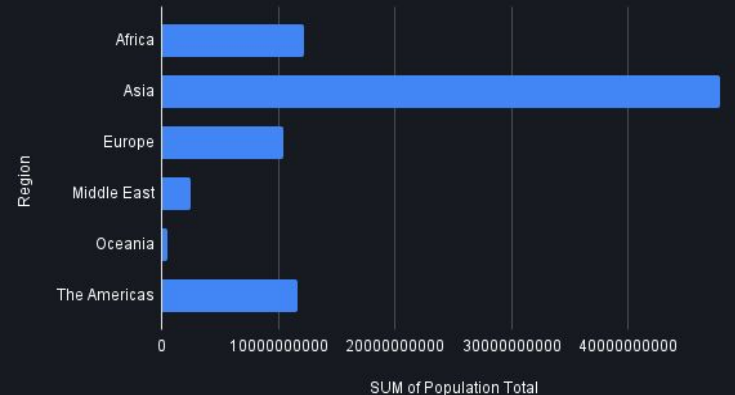

Population is directly related to GDP. High population and lower resources will reduce living quality. As we see Asia has the highest population than others country. So Asia region country should focus on population control.

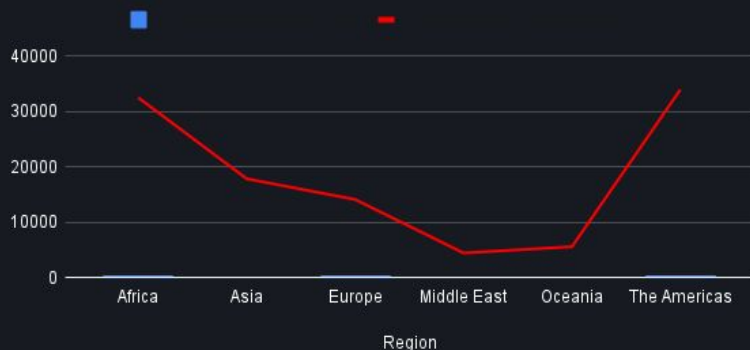

Internet Usage - Mobile Phone Usage

SUM of Population Total vs Region

SUM of Business Tax Rate and SUM of Days to Start Business

SUM of GDP/Capita
